SUMMARY

Data Governance & AI Analytics professional with 5+ years building the data infrastructure that makes AI trustworthy and auditable. Proven track record designing governance frameworks, data lineage pipelines, and quality controls across 20M+ enterprise assets; turning raw, siloed data into reliable foundations for AI-driven decisions. Expertise spans SQL, Python, Power BI, Snowflake, ServiceNow CMDB, and Azure, with hands-on experience shaping GenAI compliance workflows and enterprise metadata standards. Bridges the gap between data engineering and business strategy, translating governance requirements into measurable outcomes for insurance, finance, SaaS, and IoT domains.

TECHNICAL SKILLS

Languages: SQL, Python, R, Excel, C/C++

Data Governance & Quality: Data Lineage, Metadata Management, Data Cataloging, Master Data Management, CMDB Governance, Ownership Frameworks, Data Profiling, Data Quality Analysis, Policy & Standards Authoring

AI & GenAI Enablement: RAG Architecture, Knowledge Retrieval Design, GenAI Chatbot Requirements, Prompt Engineering, AI Cost Optimization, Responsible AI Principles

Data Engineering & Automation: Databricks, dbt, REST APIs, Power Query, Power Automate, ETL/ELT

Enterprise Platforms & Governance: ServiceNow CMDB, SAP S/4 HANA

BI & Data Visualization: Power BI, Tableau, Looker, AWS QuickSight

Cloud & Data Platforms: Snowflake, Azure, Microsoft Fabric, Azure Data Factory (ADF), AWS (Bedrock, QuickSight), PostgreSQL, BigQuery, Redshift

Analytics & Statistics: A/B Testing, Forecasting, Regression, Hypothesis Testing, Predictive Analytics, Data Profiling, Data Quality Analysis, API Data Integration

Business & Delivery: Jira, Confluence, BRD/FRD Documentation, User Stories & Acceptance Criteria, Process Mapping / Workflow Documentation, Requirements Gathering, UAT Coordination, KPI Development, Agile / Scrum Collaboration

EXPERIENCE

W.R. Berkley—Data Analyst | Jersey City, NJ

July 2025 – Present

- **Data Governance Architecture:** Designed and implemented an enterprise-wide Digital Asset & Application Inventory governance model defining ownership structures, data quality KPIs, and lifecycle standards across 20M+ configuration items, improving compliance visibility and audit readiness.
- **AI Analytics & Cost Intelligence:** Built Power BI dashboards integrating Azure Cost Management, Cosmos DB, SQL Server, and Azure Document Intelligence to surface AI token consumption trends and resource utilization, enabling leadership to reduce AI infra spend.
- **Data Quality & Lineage:** Engineered integrations across ServiceNow CMDB, Tenable, Tanium, Infoblox, and SnowMirror using REST APIs, SQL, and Python, processing 1.5TB+ of infrastructure data; identified orphaned assets, duplicate records, and ownership gaps to drive governance remediation workflows.
- **Enterprise Rationalization:** Led application rationalization analysis across lifecycle, usage, cost, and compliance dimensions and partnered with infrastructure and security leaders to validate insights and inform modernization and retirement decisions.

Technoid—Data Analyst | Piscataway, NJ

Sep 2024 – July 2025

- **Revenue Impact:** Drove 200% revenue growth (\$100K → \$300K) through pricing analysis, customer segmentation modeling, and data-driven process optimization.
- **Decision Intelligence:** Built SQL-driven Power BI dashboards that improved decision-making accuracy by 30% and cut reporting turnaround time by 35%.
- **Reporting Automation:** Automated weekly performance reporting workflows, reducing manual effort from 10 to 6 hours per week, a 40% efficiency gain.
- **Marketing Analytics:** Conducted A/B testing and channel BI analytics, increasing customer engagement by 30% over 18 months.

Wolters Kluwer—Data Analyst | New York, NY

Jan 2024 – May 2024

- **GenAI Governance Design:** Led stakeholder discovery and requirements sessions to architect a GenAI-powered conversational chatbot for compliance and data governance — defining knowledge retrieval logic, business rules, regulatory data sources, and workflow design that now supports 80+ clients annually.
- **Data Quality & Search Optimization:** Analyzed and restructured a 700+ record regulatory licensing dataset using SQL and Python, improving search efficiency by 40% and saving 70+ hours of manual compliance analysis.
- **Process Documentation:** Documented chatbot interaction flows, data lineage, and governance standards, reducing client onboarding time by 40%.

Innovatio Hub—Data Analyst | Hyderabad, India*Dec 2019 – Nov 2022*

- **Governance Frameworks:** Implemented data governance frameworks to standardize metadata capture and data quality controls across IoT datasets, reducing system errors by 40%.
- **Operational Analytics:** Analyzed IoT device performance data and visualized 300+ error patterns in Tableau, reducing issue identification time by 22%.
- **Energy Efficiency:** Developed KPI dashboards that enabled targeted interventions reducing energy consumption by 35%, saving approximately \$15K annually.

EDUCATION**MS, Information Systems,** Stevens Institute of Technology | Hoboken, NJ |*Jan 2023 – May 2024***BS, Mechanical Engineering,** Jawaharlal Nehru Technological University | Hyderabad, India |*July 2018 – Aug 2022*
